

# How to Connect the Apple Health App to Your BMH Health Information

1. Find the Apple Health app on your iOS device.

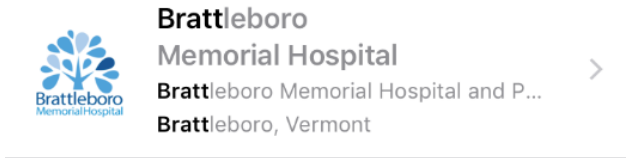

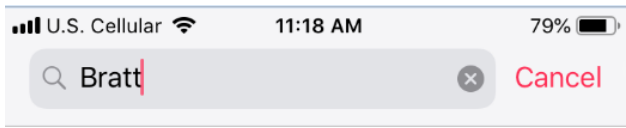

2. Open the "Health Records" section.

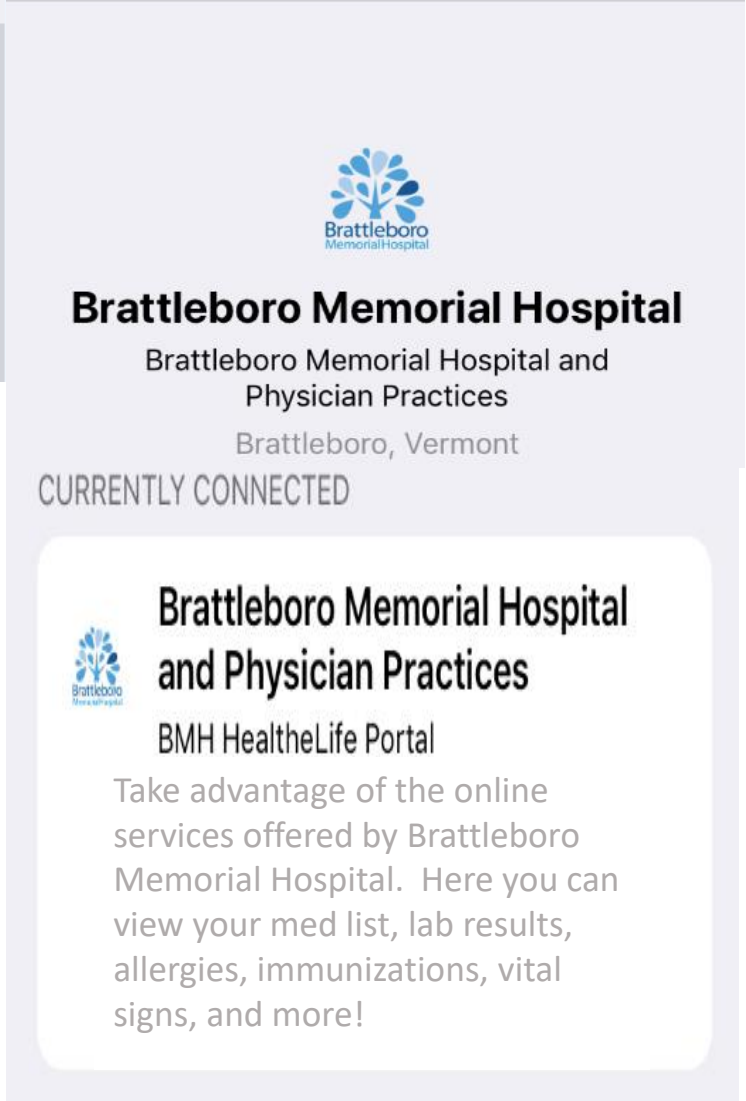

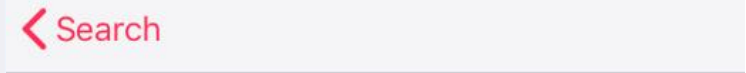

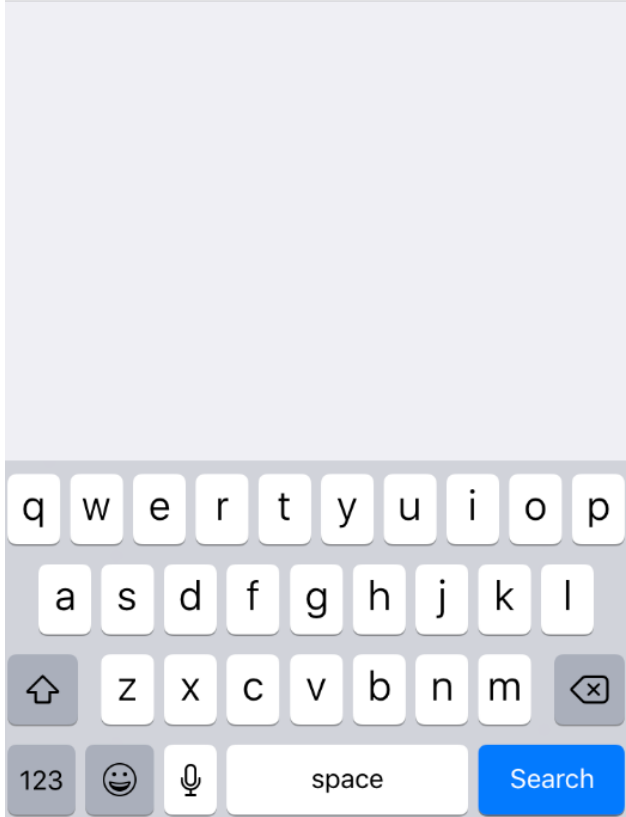

3. You will be brought to a search screen.

4. Search for, and then select “Brattleboro Memorial Hospital.” If you are connected to other patient portals with other facilities, you can search for those here in addition to BMH.

5. Once you are logged in, select any of these categories to view your health information.
